## Name:

1. State which side of each of the following triangles is the hypotenuse.
(a)

Z
(b)

$\square$

(c)

2. What is the length of the hypotenuse in the following triangles?
(a)

(b)

3. The three side lengths of two right-angled triangles are listed below. For each triangle state the length of the hypotenuse.
(a) $35,12,37$
(b) $60,61,11$

4. For the following triangles list the sides that are opposite and adjacent to the angle $\theta$, and state the hypotenuse.

| Triangle | Side <br> Opposite <br> $\theta$ | Side <br> Adjacent to <br> $\theta$ | Hypotenuse |
| :---: | :---: | :---: | :---: |
| A |  |  |  |
| B |  |  |  |
| $\mathbf{C}$ |  |  |  |

5. On this triangle mark angle, $\theta$, so that side $a$ is opposite $\theta$.

6. On this triangle mark angle, $\alpha$, so that side $x$ is adjacent to $\alpha$.

7. On the triangles below label the sides $O$ (opposite), $A$ (adjacent) and $H$ hypotenuse for the angle shown.
